

## Weekly Stakeholder Snapshot

Location: Sevenoaks Greatness Park  
Project: Greatness Pavilion  
Client: Sevenoaks Town Council / FC  
Project Number: LG - 2395  
Report Date: 02/04/2026  
Week Number - 023

Patrick Steppel  
Project Manager

**On-site KPIs:**

	Applicable	Comments
Health & Safety inspections completed	Yes	No health and safety issues to report
Programme reviewed	Yes	The programme has been reviewed, and we are currently on programme
Internal quality inspection undertaken	Yes	Not relevant to works on site, Currently.

**Weekly Progress to Report:**

This week has seen excellent progress across all areas of the build. Our roofing division has now completed the weathering to all box gutter details and successfully laid the green roof. The man-safe system has been fully installed and commissioned, and all SVP and cable roof penetrations have been weathered.

Our carpentry team has also made strong headway, completing around 70% of the soffit cladding and installing approximately 80% of the ceiling joists to the first-floor area. In addition, our window and door suppliers have been on site to install the large window frame surrounding the internal staircase, as well as the door frame on the ground-floor pitch side elevation.

Meanwhile, the screeding team has continued preparing the ground-floor area with the installation of the damp-proof gas membrane, ensuring the space is ready for the next phase of works.

**Early warnings and noticeable delays to the programme:** No early warnings to report on site

**Weekly Look Ahead:**

Looking ahead to next week, our screeding team will progress to insulating the ground-floor area in preparation for the plumbing team, who will then begin installing all underfloor heating pipework. Our carpentry team will continue their efforts on site, focusing on completing the remaining joist work to the first floor and closing out the final sections of high-level cladding. In parallel, the window suppliers are scheduled to return to install all remaining window and door frames across both floors as we work toward fully sealing the building and moving into the next stage of the project.

## Weekly Progress Photos:

## Social Values latest highlights:

We installed two 'Walls of Kindness' on the hoarding of sites in Bromley for public coat donations. They have the simple message 'Take a coat if you're cold. Leave a coat if you no longer need it.' Both sites are in high footfall areas within the community, we felt it was the perfect way to spread some warmth and kindness.

We held a Construction Assembly at Seven Kings Primary School for KS2 students after being contracted to add new SEN rooms. The children were really engaged and had lots of questions about the construction industry. We took them through not only the work completed at their school but also the different items of PPE, other safety equipment, tools, building materials and the different trades.

We continued foodbank donations to Trussell Trust across London boroughs over the Summer holidays. Food banks experience an unprecedented level of demand during the school summer break. Some households struggle to feed children who ordinarily get free school meals during term-time so knew it would make a real impact.

We ran a Careers in Construction workshop at Canvas Walthamstow after completing room conversions within this student accommodation venue for university students looking to enter the Construction industry. It was a great way to close this project and have some engaging conversations.

## Social Values continued:

We donated 200 Easter eggs to the local Children's Ward at PRUH (Princess Royal University Hospital). Hopefully, these brought smiles to some brave young faces. A huge thank you to the amazing staff for the incredible work they do every single day. We're proud to have supported an important part of our community.

We invited the nursery children to visit the construction site at St Michael's Primary School to come and have a look around the new replacement nursery block building, currently under construction. It was a fantastic opportunity for the little ones to see the progress and get a sneak peek at the new learning space.

We were delighted to continue our engagement with a Ilford County High School by taking part in their recent Careers Fair, aimed at Year 10 and Year 12 students exploring future career options. Our team shared insights into the wide range of roles within the construction and built environment sectors.

We built an outdoor sensory musical area at West Byfleet Infant School for the KS1 students. This initiative not only enriches the school's outdoor space but also aligns with the company's commitment to supporting local education and wellbeing.
