

## Weekly Stakeholder Snapshot

Location: Sevenoaks Greatness Park  
Project: Greatness Pavilion  
Client: Sevenoaks Town Council / FC  
Project Number: LG - 2395  
Report Date: 20/03/2026  
Week Number - 021

Patrick Steppel  
Project Manager

## On-site KPIs:

	Applicable	Comments
Health & Safety inspections completed	Yes	No health and safety issues to report
Programme reviewed	Yes	The programme has been reviewed, and we are currently on programme
Internal quality inspection undertaken	Yes	Not relevant to works on site, Currently.

## Weekly Progress to Report:

This week the on-site team have made strong progress across several key areas of the project.

The carpentry team have completed all box gutter formations and fully framed the soffit locations, putting everything in place for the cladding installation to begin next week.

Our building works team has ensured that all insulation to the roof and box gutter perimeters, as well as the high-level steelwork, has been installed strictly in line with the project specifications and drawings.

Meanwhile, the procurement team have finalised the solar package, allowing us to move forward with scheduling that phase of the works and keeping the project aligned with our planned programme timelines.

**Early warnings and noticeable delays to the programme:** No early warnings to report on site

## Weekly Look Ahead:

Next week the carpentry team will complete the cladding to the high-level soffit areas while simultaneously beginning the framing of the first-floor ceiling, preparing the space for fire line boarding at a later stage.

Our window and door supplier is also scheduled to arrive on site with all frames and glazing for both floors, allowing installation to begin immediately. This will move the project another step closer to achieving full weatherproofing and will set the stage for transitioning into the internal phase of works.

## Weekly Progress Photos:

## Social Values latest highlights:

We installed two 'Walls of Kindness' on the hoarding of sites in Bromley for public coat donations. They have the simple message 'Take a coat if you're cold. Leave a coat if you no longer need it.' Both sites are in high footfall areas within the community, we felt it was the perfect way to spread some warmth and kindness.

We held a Construction Assembly at Seven Kings Primary School for KS2 students after being contracted to add new SEN rooms. The children were really engaged and had lots of questions about the construction industry. We took them through not only the work completed at their school but also the different items of PPE, other safety equipment, tools, building materials and the different trades.

We continued foodbank donations to Trussell Trust across London boroughs over the Summer holidays. Food banks experience an unprecedented level of demand during the school summer break. Some households struggle to feed children who ordinarily get free school meals during term-time so knew it would make a real impact.

We ran a Careers in Construction workshop at Canvas Walthamstow after completing room conversions within this student accommodation venue for university students looking to enter the Construction industry. It was a great way to close this project and have some engaging conversations.

## Social Values continued:

We donated 200 Easter eggs to the local Children's Ward at PRUH (Princess Royal University Hospital). Hopefully, these brought smiles to some brave young faces. A huge thank you to the amazing staff for the incredible work they do every single day. We're proud to have supported an important part of our community.

We invited the nursery children to visit the construction site at St Michael's Primary School to come and have a look around the new replacement nursery block building, currently under construction. It was a fantastic opportunity for the little ones to see the progress and get a sneak peek at the new learning space.

We were delighted to continue our engagement with a Ilford County High School by taking part in their recent Careers Fair, aimed at Year 10 and Year 12 students exploring future career options. Our team shared insights into the wide range of roles within the construction and built environment sectors.

We built an outdoor sensory musical area at West Byfleet Infant School for the KS1 students. This initiative not only enriches the school's outdoor space but also aligns with the company's commitment to supporting local education and wellbeing.
