

Weekly Stakeholder Snapshot

Location: Sevenoaks Greatness Park
Project: Greatness Pavilion
Client: Sevenoaks Town Council / FC
Project Number: LG - 2395
Report Date: 06/03/2026
Week Number - 019

Patrick Steppel
Project Manager

On-site KPIs:

	Applicable	Comments
Health & Safety inspections completed	Yes	No health and safety issues to report
Programme reviewed	Yes	The programme has been reviewed, and we are currently on programme
Internal quality inspection undertaken	Yes	Not relevant to works on site, Currently.

Weekly Progress to Report:

Significant progress has been made across several aspects of the build programme this week. As planned, our bricklaying team finalised all external and internal brick and block work, and their activities on site are now complete. The brickwork cleaning team is on site today carrying out a thorough clean-down of all brickwork elevations.

The lightning protection team has attended to install their fixing tails at roof level. Our steel fabricators have also completed the installation of the roof perimeter steels, and the corrugated tin roof deck has now been fully installed, preparing the structure for the next phase of works.

Our scaffolding team has been on site undertaking a series of adaptations to support the changing requirements of each construction phase. These adjustments ensure safe access and efficient workflow as we progress through the programme.

From a procurement perspective, the underfloor heating and floor screeding package has now been finalised. These elements have been booked in accordance with the programme, ensuring continuity as we move into the next stage of internal works.

Early warnings and noticeable delays to the programme: No early warnings to report on site

Weekly Look Ahead:

Next week we have our carpentry team arriving on site to begin installing the structural timber framework at roof level. Their primary focus will be framing out the soffit and canopy details, as well as forming the box-gutter detail around the full perimeter of the roof. In addition, the diamond drilling contractors will be on site to carry out their works in accordance with our marked plan for the planned service routes. We also have our periodic building control visit scheduled, which will support the continued sign-off of works as we progress through the programme.

Social Values latest highlights:

We installed two 'Walls of Kindness' on the hoarding of sites in Bromley for public coat donations. They have the simple message 'Take a coat if you're cold. Leave a coat if you no longer need it.' Both sites are in high footfall areas within the community, we felt it was the perfect way to spread some warmth and kindness.

We held a Construction Assembly at Seven Kings Primary School for KS2 students after being contracted to add new SEN rooms. The children were really engaged and had lots of questions about the construction industry. We took them through not only the work completed at their school but also the different items of PPE, other safety equipment, tools, building materials and the different trades.

We continued foodbank donations to Trussell Trust across London boroughs over the Summer holidays. Food banks experience an unprecedented level of demand during the school summer break. Some households struggle to feed children who ordinarily get free school meals during term-time so knew it would make a real impact.

We ran a Careers in Construction workshop at Canvas Walthamstow after completing room conversions within this student accommodation venue for university students looking to enter the Construction industry. It was a great way to close this project and have some engaging conversations.

Social Values continued:

We donated 200 Easter eggs to the local Children's Ward at PRUH (Princess Royal University Hospital). Hopefully, these brought smiles to some brave young faces. A huge thank you to the amazing staff for the incredible work they do every single day. We're proud to have supported an important part of our community.

We invited the nursery children to visit the construction site at St Michael's Primary School to come and have a look around the new replacement nursery block building, currently under construction. It was a fantastic opportunity for the little ones to see the progress and get a sneak peek at the new learning space.

We were delighted to continue our engagement with a Ilford County High School by taking part in their recent Careers Fair, aimed at Year 10 and Year 12 students exploring future career options. Our team shared insights into the wide range of roles within the construction and built environment sectors.

We built an outdoor sensory musical area at West Byfleet Infant School for the KS1 students. This initiative not only enriches the school's outdoor space but also aligns with the company's commitment to supporting local education and wellbeing.
