

Weekly Stakeholder Snapshot

Location: Sevenoaks Greatness Park
Project: Greatness Pavilion
Client: Sevenoaks Town Council / FC
Project Number: LG - 2395
Report Date: 06/02/2026
Week Number - 015

Patrick Steppel
Project Manager

On-site KPIs:

	Applicable	Comments
Health & Safety inspections completed	Yes	No health and safety issues to report
Programme reviewed	Yes	The programme has been reviewed, and we are currently on programme
Internal quality inspection undertaken	Yes	Not relevant to works on site, Currently.

Weekly Progress to Report:

During the past week, progress on site continued steadily despite periods of adverse weather. The steel fabrication team worked efficiently throughout these conditions and succeeded in completing approximately 90% of the first-floor and roof steel structure. The installation has been carried out in accordance with the structural requirements, and the works completed to date have positioned the project well for the next stage of the superstructure.

Alongside the steelwork, the bricklaying team made strong headway with the external brick and blockwork to the ground-floor perimeter. Their flexible approach allowed them to maintain productivity during wet weather by commencing the internal blockwork walls, ensuring that progress remained consistent and aligned with the construction programme.

This coordinated effort across both teams has enabled the project to remain on schedule, with no significant delays arising from the challenging weather conditions.

Early warnings and noticeable delays to the programme: No early warnings to report on site

Weekly Look Ahead:

Next week, the steel fabrication team is scheduled to return to site to complete the remaining elements required to finalise the first-floor and roof steel structure. Their focus will be on closing out all outstanding connections and ensuring the steelwork is fully installed in accordance with the design requirements.

At the same time, the bricklaying team will continue progressing the internal blockwork walls on the ground floor. The intention for the coming week is to achieve approximately eighty per cent completion of these internal walls, maintaining alignment with the overall construction programme and supporting the continued advancement of the superstructure.

Social Values latest highlights:

We installed two 'Walls of Kindness' on the hoarding of sites in Bromley for public coat donations. They have the simple message 'Take a coat if you're cold. Leave a coat if you no longer need it.' Both sites are in high footfall areas within the community, we felt it was the perfect way to spread some warmth and kindness.

We held a Construction Assembly at Seven Kings Primary School for KS2 students after being contracted to add new SEN rooms. The children were really engaged and had lots of questions about the construction industry. We took them through not only the work completed at their school but also the different items of PPE, other safety equipment, tools, building materials and the different trades.

We continued foodbank donations to Trussell Trust across London boroughs over the Summer holidays. Food banks experience an unprecedented level of demand during the school summer break. Some households struggle to feed children who ordinarily get free school meals during term-time so knew it would make a real impact.

We ran a Careers in Construction workshop at Canvas Walthamstow after completing room conversions within this student accommodation venue for university students looking to enter the Construction industry. It was a great way to close this project and have some engaging conversations.

Social Values continued:

We donated 200 Easter eggs to the local Children's Ward at PRUH (Princess Royal University Hospital). Hopefully, these brought smiles to some brave young faces. A huge thank you to the amazing staff for the incredible work they do every single day. We're proud to have supported an important part of our community.

We invited the nursery children to visit the construction site at St Michael's Primary School to come and have a look around the new replacement nursery block building, currently under construction. It was a fantastic opportunity for the little ones to see the progress and get a sneak peek at the new learning space.

We were delighted to continue our engagement with a Ilford County High School by taking part in their recent Careers Fair, aimed at Year 10 and Year 12 students exploring future career options. Our team shared insights into the wide range of roles within the construction and built environment sectors.

We built an outdoor sensory musical area at West Byfleet Infant School for the KS1 students. This initiative not only enriches the school's outdoor space but also aligns with the company's commitment to supporting local education and wellbeing.
