The following table is to be read in conjunction with Sevenoaks Town Council's full Highway Improvement Plan, which provides further information on each HIP Priority Item. Priority Items have been restructured by Sevenoaks Town Council's Movement & Net Zero Working Group (13th January 2025) in order to facilitate their delivery, the order of which was approved by the Town Council's Planning & Environment Committee on 2 th January 2025.

Estimated starting costs have been deduced from KCC's Highway Improvement Plan Information Pack 2024-2025 and are for indicative use only, to aid in reorganising the priorities via potential cost range. They do not constitute formal quotes from KCC, nor may they encompass all related costs. Each item will be subject to independent investigation and costings by KCC, with potential for prices to rise significantly should any additional engineering be needed.

	For Immediate Pursual		During Term of Office (2023-2027)	Requ	uires further details or significant funds

Botolph's Road, St John's Hill/Dartford Road, Seal Hollow Road (30mph roads surrounded by 20mph roads)

Tonbridge Road on approach to Sevenoaks School and Seal Hollow Road (60-40mph roads proposed for gradual reduction)

30mph and 40mph affecting the aforementioned roads in particular, making it difficult for motorists to adhere to speed limits due to now knowing what they are.

Re Tonbridge Road: The 40mph speed limit ends just outside the Southern entrance to Sevenoaks School which caused the school to not be includable in the 20mph scheme introduced primarily to increase student safety.

High speeds on **Tonbridge Road**

include roads which couldn't be included in the previous scheme due to be delivered by September 2024. This includes Mount Harry,

Hitchen Hatch, St Botolph's, St John's/Dartford Road, and the middle section of Seal Hollow Road due to potential compliancy issues, as well as the approach to Sevenoaks School from Tonbridge Road. The latter couldn't be included due to being too close to the 40mph speed limit and therefore not enforceable.

> STC proposes that the 30mph

Traffic and pedestrian survey: £85 x week for ATC tube £700 for manual

pedestrian count (12 hours)

Informal consultation exercise (required): ~£3,000 (if advertised via exclusive Town Crier, as previously)

Traffic Regulation Order: £3.000 + additional £685 for JTB report, if referred.

Zone entry treatment for proposed Tonbridge Road speed changes: £1,600 x 3 (for each speed change) Speed limit repeater signs – amount unknown: £320 each

Active Travel (AT) - NR to meet with meet with AT and then arrange joint meeting with STC. NR – 13/9/24 Spoke with SB from Active Travel team who has commented 'the extent of the 20mph has been identified and will need to be installed and monitored for at least 18 months before we start looking at any expansion'. AT were looking at ways to reduce the speeds along the roads that don't currently qualify for a 20mph such as:

Hitchen Hatch Road – moving parking bays to create a chicane effect.

Installing of advisory cycle lanes to narrow the carriageway.

Spilt out Tonbridge Road comments to new line:

Tonbridge Road, approaching Sevenoaks School (40mph from Gracious Lane) - NR to look at average speeds on ATC outside of rush hour more in depth analysis of the results.

May be too high for a 30mph – could we engineer the environment to naturally lower speeds to qualify for a 30mph?

Also check av. speeds on hill from Morlevs roundabout to Sevenoaks - could this be reduced to 50mph or are speeds already below this?

improve signage
at motorway
junctions to direct
freight to use the
M25 and the A21
bypass, rather
than A25 through
Sevenoaks and
neighbouring
villages.

Opportunities for **positive signing** to be explored and installed, which directs HGVs towards more appropriate routes.

This as supported by Aim M10 of the Sevenoaks Town Neighbourhood Plan. Traffic Regulation Order: £3,000

+

Additional £685 for JTB report, if referred.

+

Restriction entry signs (2 pairs) £686 per sign for width restrictions, £915 per sign for weight limits. Advisory sign costs not indicated, but "new warning/information signs" are estimated to start from £635 each

4

Design fees: £1124 (based on anticipated construction cost being between £1,000-£10,000)

=

Minimum benchmark for HGV restrictions: £7,683 width restriction

Need to look at the wider area – where are lorries travelling (to Dover and Marden) and where could we put signs to divert traffic away from the High Street/ where would they displace to?

What about advisory signs at pinch points in upper High Street, between the church and fountain, as well as outside Market House and by The Stag? These sections are too narrow for HGVs to pass and it's a conservation area. Could this help justify a weight/ width restriction?

Waitrose and M&S etc have their own loading bays off the High Street so wouldn't necessarily need to be exempt for access via the High Street.

	via	not to use them, then there is not a lot we can do.
Section 106		
agreements		As it is a large site, delay before the pedestrian green
		man appearing can be a while, though all the controlled
		crossings are walk with traffic to reduce the delays to
		pedestrians. The wait time could be reduced, but that
		will have a knock-on effect and would increase the
		delays to vehicles which would also likely increase the
		queues at the junction.
		Adding a pedestrian phase to the West side of the
		junction is possible, though this would require a
		reconfiguration of the controller and reduce efficiency,
		as some traffic would have to be held on red for the
		pedestrian demand to be served. There would also be
		works required to install the crossing and the lining
		would have to be adjusted to accommodate the new
		crossing.
		Grossing.
		The read is ever 11m wide at this point as there is a
		The road is over 11m wide at this point, so there is a
		possibility of installing a pedestrian island so walk with
		traffic could be utilised. However, this would require
		quite a bit of civils work and would need a controller
		reconfiguration.

					It also needs to be mentioned that the controller and
					signal heads are over 12 years old, so well into their
					design life and the actual poles were not replaced at
					this time, so it may require significant works to make
					changes.

compromising pedestrian safety. This solution was suggested by KCC Officer Alan Osuoha on 15-03-2023. STC did confirm its wish to pursue this after having taken the proposal to its Planning Committee on 03-04-2023, and requested information as to next steps on 14-04-2023, however this was not responded to either by the engineers copied into the email chain, or STC's **HIP Officer Nigel** Rowe.

sufficient and road safety audits aren't needed instead.

£2,505 if road safety audits are sufficient and traffic and pedestrian surveys aren't needed.

£3,290 if all of the above tests are needed.

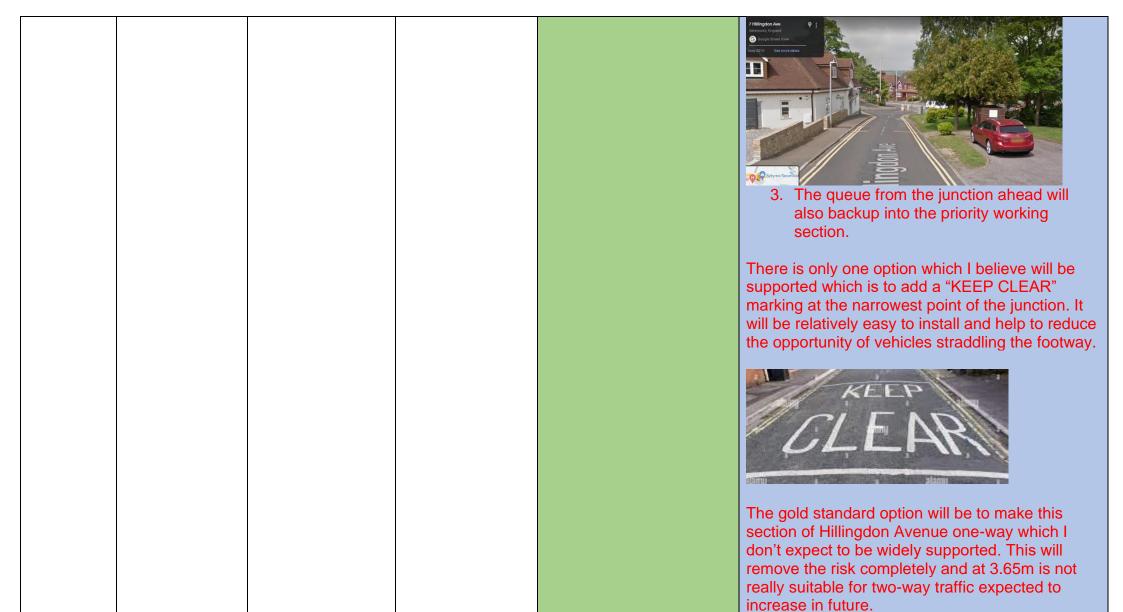

Avenue, I can confirm this will not be a feasible option for a few reasons.

1. There is insufficient road space to install the physical build-out works required for a good priority working scheme.

(The image below shows a good example where a physical build-out forces the traffic to have to give-way) - If only signs and marking are used as you have suggested, then vehicles will simply ignore them. The image below shows a good example in which the vehicle is forced to give-way.

2. There is a very poor sight lines visibility of turning vehicles from the A25 into Hillingdon Avenue. The image below shows what the sightline is for a vehicle giving way to the proposed prioritised movement from the A25.

					Hope the above is helpful in addressing your concerns. NR –16/9/24 Spoke with AO from Active Travel. He is aware of this junction and has been working on a design for 'Keep Clear' as above. Unfortunately, the Active Travel Budget will not cover as slightly outside of jurisdiction of their schemes. I have asked AO to send drawings to HIT and I will search and see if any funding available.
5.	Seal Road/Greatness Park	Pedestrian crossing safety and lack of crossing facilities	Crossing facilities as well as signage to warn traffic on the A25 that people might cross here, or to protect the poor sightlines on the road.	For a zebra crossing: Pedestrian count and speed survey: £800 + 2x road safety audits (required for any physical changes to road layout): £995 each + Basic zebra crossing: £24,000 +	We do not believe, on initial look that the road environment near to Mill Lane is suitable for a crossing and there are no signs available to warn of pedestrians crossing a road where there is no formal crossing in place. NR to ask P&A if there is an option to convert the existing tactile dropped kerb crossing with a zebra?

				Design fees: £2,083 (based on anticipated construction cost being between £10,000-£30,000) Minimum benchmark for zebra crossing: £28,873	School children have to cross the A25 to access the footway just east of Mill Lane to get to school however there is also repressed demand as school children are being driven to school due to the perceived safety of the road and there is significant development coming that will increase demand/ justification for a crossing at this location.
6.	Hillingdon Avenue	Lack of safe access or crossing points for students	A public consultation was done by KCC on safe crossing points at Hillingdon Avenue and Seal Hollow Road, however nothing was followed through afterwards. Please could this be investigated, and also both feasibility and deliverability studies of safe crossing points produced.		Believe this was carried our by a developer/ KCC Education? AT (AO) said this was going to be implemented as part of the east-west cycle path but this has since been moved so seems to have been dropped – NR to speak to AO and D&TP to ascertain where this has got to. NR – 16/9/24 Spoke with AO from Active Travel . The crossing point at Seal Hollow Road was looked into but the desire line and visibility is poor at the end of the path from Hillingdon. The most direct cycle route was deemed to be The Crescent where we are placing raised tables to facilitate.
7 .	Hospital Road outside Hospital	The Hospital has informed Cllr Richard Streatfeild	Add crossing points on Hospital Road.	For a frail people warning sign:	It is not possible to install a formal crossing here due to physical limitations and it is a quiet road.

	that it fails its safety test every year due to not having any safe crossing points to access it.		New warning/information signs: £635 each	NR to find out if they can have a frail people warning sign? – find out if possible before 16 September so that STC can see if this would be acceptable to the Hospital.
Bradbourne Vale Road/Betenson Avenue where it meets Shoreham Lane	facilities and poor sightlines for	Crossing facilities as well as signage to warn traffic approaching the hill from either side that people might cross here.	For a dropped kerb crossing with tactiles: Dropped kerb pair: £1,260 + Tactile paving: Cost not indicated. + Design fees: £1124 (based on anticipated construction cost being between £1,000-£10,000) = Minimum benchmark for dropped kerb and tactile paving: £2,384 + cost of tactile paving.	The road environment is not suitable for a crossing and there are no signs available to warn of pedestrians crossing a road where there is no formal crossing in place. NR to find out if they could have a dropped kerb crossing with tactiles just northeast of Betenson Avenue instead.

9.	The Crescent, St Johns Road, St Johns Hill, Bradbourne Road, Bradbourne Vale Road, Littlewood, Hillingdon Avenue, corner of Bethel Road and Cedar Terrace Road Ash Platt Road	Cars parking on both sides of the road and on pavement, causing school children to walk in the road and blocking access for pushchairs and wheelchairs. Lack of parking for residents.	Review of parking arrangements e.g. resident parking schemes, 2 hour visitor parking and/or introduction of yellow lines. Consider corner protections: STC will prepare a map of locations for a TRO. Some of these roads may be covered by the Parking study which STC has recently commissioned for St John's area — this will therefore be received following that.	For corner protections: Traffic Regulation Order £3,000 + Additional £685 for JTB report, if referred. + Lines and associated signage: £800 per location + Design fees: £1124 (based on anticipated construction cost being between £1,000-£10,000) = Minimum benchmark for corner protections:	NR re Ash Platt Road – 2/11/23 Meeting with P&A to discuss options. Any intervention is likely to require pre-consultation engagement with all stakeholders including the school. TC to come up with list of locations so that we can sense check locations then STC can do an engagement exercise before doing a bulk TRO.
10.	St Johns Hill/Dartford Road	Pedestrian crossing safety	This location is no longer "on hold" due to having been removed	For a zebra crossing: Pedestrian count and speed survey: £800	NR to speak to AF and SB for an update – if they are looking at delivering this then it can be removed from the HIP as it would be an AT scheme. Otherwise we could look into the scheme. STC has funding for this.

from the 20mph scheme by KCC. STC noted that the crossing needs to go as close to 'Five Ways jct' - A225/ Hitchen Hatch Lane STC has agreed 2x road safety audits etc. as possible. to fund a zebra (required for any physical crossing on changes to road layout): NR – 13/9/24 Per SB – Active Travel Dartford Road, as £995 each 'We do still need to look at the zebra crossing on Dartford road. Need to draw up a design and put consulted on by KCC in 2022. it through stage 1' This was a "high level" design by Basic zebra crossing: Alan Osuoha £24,000 which requires further design work and costing. Design fees: At a site meeting £2,083 (based on between STC anticipated construction and KCC Officers cost being between Annette Fletches £10,000-£30,000) and Sebastian Minimum benchmark for Bures, they expressed doubt zebra crossing: as to the £28,873 deliverability of a zebra crossing at this exact location, and may need to move along road.

Historical Priorities Record

Note from Sevenoaks Town Council that despite there being numerous items on the below Historical Priorities Record, none of them have been delivered via the Highway Improvement Plan, which continues to be unsuccessful and have delivered 0 priorities since

No	Location	Problem/Concern	What do you feel are the potential solutions?	KCC Comments
1	EXAMPLE: Church Lane	Speeding off peak.	Speed Reduction	After traffic surveys obtained, data showed that vehicle speeds where within the current speed limit, therefore no further action proposed.
1.	Bat and Ball Junction, A25/A225	Inadequate, poorly designed crossing points for pedestrian safety. Considerable congestion and delays during the four daily rush hour periods and throughout the day, with particular traffic queues forming on Otford Road and Seal Road towards the junction; Very high levels of air pollution.	In STC's previous iteration of its HIP, the redesign of the Bat and Ball Junction to ensure safe pedestrian crossing was the first priority. The reduction of air pollution and congestion in this area, as well as unsafe crossing facilities remain a top priority for STC, and removing it from STC's HIP priority list has not altered that. Rather, it has been removed from the priority list, due to the Sevenoaks Quarry (Tarmac site) having since received Outline planning permission to develop the site, with conditions set in place ensuring delivery of a revised traffic and pedestrian scheme to be delivered after	

			the first stage of development at this location.	
			This is therefore unlikely for the scheme to be delivered via the HIP, and STC remains dedicated to ensuring that the resulting design best serves the needs of Sevenoaks Town residents. STC anticipates being included in discussions, stakeholder sessions and public consultations on the design with Tarmac, and will be actively engaged in the process to make sure that the design proposed achieves <u>all</u> of the following: improve pedestrian safety, reconnect the neighbourhood and reduce air pollution and traffic jams.	
2	Wickenden Avenue	Carriageway and footpaths require improvements	On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an	

			update for each site, regarding whether anything was found or actioned as a result of STC's flagging the locations. STC awaits this update.	
3	Broomfield Road	Carriageway and footpaths require improvements	On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an update for each site, regarding whether anything was found or actioned as a result	
			of STC's flagging the locations. STC awaits this update.	
4	Mill Lane	Carriageway and footpaths require improvements	On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on	

			surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an update for each site, regarding whether anything was found or actioned as a result of STC's flagging the locations. STC awaits this update.	
5	Wickenden and Swaffield Roads	Carriageway and footpaths require improvements	On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an update for each site, regarding whether anything was found or actioned as a result of STC's flagging the locations. STC awaits this update.	
6	Clare Way, Lea Road, Hurst Way and Stafford Way	Carriageway and footpaths require improvements	Surfacing improvements and repairs required	

			On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an update for each site, regarding whether anything was found or actioned as a result of STC's flagging the locations. STC awaits this update.	
7	Beaconfields	Carriageway and footpaths require improvements	On 5th January 2022, Stuart Taylor advised STC that its priorities labelled in the previous iteration of its HIP as "carriageway and footpaths require improvements" were not able to be considered under the HIP. This is because a separate team deals with issues on surfacing improvement and repairs, and he had therefore passed the items onto KCC's operations team to have a look into. The items have therefore been moved to the "Historical Priorities Record", however STC has requested that it be sent an	

			update for each site, regarding whether anything was found or actioned as a result of STC's flagging the locations. STC awaits this update.	
7.	Clare Way	Residents have been reported as parking in the "Keep	STC has requested that a further deterrent of yellow lined be painted at this location.	
		Clear" section on this road dead-end road, which was introduced in order	*Note: this was formally requested by STC in a letter to SDC and KCC departments, dated 17-07-2023.	
		to allow emergency vehicles to turn around.	*Further Note 08-09-2023 STC has prepared a consultation which should commence shortly.	
			06/11/2023: Due to strong and mixed resident consultation responses, the Planning Committee resolved to keep the situation under review in hopes that the informal consultation and potential for subsequent TRO would act as a satisfactory deterrent.	
	Letter Box Lane	Poor sight lines on entering Letter Box Lane making motorists unaware that traffic is	Extending the double yellow lines further into Letter Box Lane to allow cars exiting the Lane to correct onto the left side of the road before nearing the exit – in order to avoid potential collisions with those entering the Lane.	
		displaced onto the wrong side of the road by the new corner protections, whereby these do	Request sent to KCC previously, but the existing TRO could not be extended without new TRO. STC resolved to monitor the effectiveness of the corner protections as	

	not extend far enough into the Lane to allow cars to move onto the correct side of the road before nearing the exit.	originally designed by KCC and to consider funding extension in future, should monitoring efforts find that the safety of motorists is indeed negatively impacted.	
20 mph limi zone as this requires engineering	the need to ensure pedestrian and	the LCWIP. Delivered 12 th August – 1 st September 2024,
